Automate your business with CustomiseTM

Every business software solution faces unique challenges. The Loft Group generates customised software packages that are tailored to fit your specific requirements. In many cases an off the shelf solution lacks attention to detail where you need it or simply none exist.

The Loft Group has the knowledge and expertise to develop a custom solution that is both intuitive to operate and provides a secure business tool for your company data. Custom software represents an investment in the future of your business and provides the platform for future growth.

Custom software fills the gap between what is available in the marketplace and what you need to achieve.

Take the time to review processes that involve repetitive tasks and streamline manual process towards automated solutions.

Manage Your business future

The Loft Group understands how your business needs to communicate with customers, partners and suppliers. Our solutions integrate seamlessly and efficiently, enabling your business to confidently manage the future and improve service across your organisation.

Training and support

Knowing how to use your custom software is an ongoing process that requires close client collaboration throughout the project development. The Loft Group provides expertise to support training from the end-user to administrator. Your people are the key to a successful software launch within your organisation. Providing the essential training and documentation necessary for individuals to embrace change and support the business management objectives.

The Loft Group can offer either on-site or class-based training facilities, user manuals plus an integrated education plan to match the custom software development and implementation process.
